1 Introduction

This document contains relevant information for merchants on how to use the automated TSV transaction downloader. This interface is designed for automation and NOT to be used with the browser.

2 Method

To use this interface a merchant MUST create their own script, which uses an https GET query string as below, to retrieve the appropriate transactions.

```
https://username:password@securetrading.net/merchantServices/merchantsvdownload.cgi?sitereference=username&startdate=dd/mm/yyyy&enddate=dd/mm/yyyy
```

Key:

username = Site Reference (as given to you by support, when you first joined SecureTrading)

password = As given to you when you joined SecureTrading

startdate = The date you wish to start searching for transactions

enddate = The date you wish to end searching for transactions

3 Output

This cgi script will return your transactions within the search dates specified as per the TSV downloader located within the merchant services area.

4 Required fields

The following fields are required to be present within the https get query string for this interface to respond appropriately

- a) startdate
- b) enddate
- c) sitereference

5 Additional notes

- a) In accordance with the SecureTrading specifications any tabbed spaces located within the field values will be replaced with spaces.
- b) The Content Type for the output page is text/tab-separated-values
